

2018 Aquatics Supervision Courses: BSA Aquatics Training for Adult Leaders

When a BSA scouting unit plans an aquatic activity (swimming, canoeing, kayaking, white-water rafting, tubing, etc.) without a responsible outfitter or at non-BSA sites, it is **strongly recommended** that a person from that unit age 21 or older holds a valid **Paddle Craft Safety** and **Swimming and Water Rescue Certifications**. This training helps you obtain both these Certifications.

Prerequisites and Preparation:

Candidates must have recently completed their **Safe Swim Defense** and **Safety Afloat** online training. They must bring their completed BSA Medical forms on the day of the course. Participants must be able to pass the BSA Swim Test. They must review the **BSA Aquatic Supervision Manual**. The details of a download copy accompany registration. There will be a written test on this material. There is a sample test in the manual. Additional information and directions will be provided on registration.

What to bring:

- (3) A bag lunch. (2) Swim suit, towel & rash guard. (3) Boating clothes & water shoes.
- (4) A change of clothes: you will get wet. (5) BSA Medical Forms A and B

Aquatic Supervision: June 9, 2018

Register at <http://www.baltimorebsa.org/event/aquatics-training-for-adults-june9>

Aquatic Supervision: July 7, 2018

Register at <http://www.baltimorebsa.org/event/aquatics-training-for-adults-july7>
